RE: ADP Mirrors Standards – AS1288

To whom this may concern,

This is to confirm that the mirrors (including mirrors on mirrored cabinets) sold by Architectural Designer Products satisfy the requirements set out in the Australian Standards AS1288-2006, Section 5 – 5.8, which requires mirrors within 2000mm from floor level be allowed only when vinyl backed or adhered to a solid surface and/or if adhered to glass, the glass must be toughened relating to the human impact safety requirements of the code.

Individual approval certificates are not applicable as the products are produced from sheet raw materials and manufactured to size.
